SECTION SF 30 BLOCK 14 CONTINUATION PAGE

The following items are applicable to this modification:**DESCRIPTION OF AMENDMENT**

Solicitation W91248-06-Q-0030, Removal of Old and Replacement of Existing Fire Alarm Systems in Bldg 7179, Fort Campbell, KY is amended as follows:

A. Closing date is changed to read: 21 Aug 2006, 1pm CST.

B. Questions/Answers pertaining to the solicitation:

Question 1: Considering the limited size of this system is a conventional zone (10 zone) sytem acceptable or will the requirement be an addressable one? **Answer 1:** Yes, a conventional 10 zone system is acceptable. A Fire Lite 1024 or approved equal should be used.

Question 2: Duct smoke detectors for air-handler in mechanical room not indicated on plan. **Answer 2:** Duct Smoke Detector on the supply side only is to be included; duct detector shall send trouble signal and shut down air handler.

Question 3: Strobe light in men's RR not indicated on drawing? **Answer 3:** This is an oversight; the revised (Sht 1 revision 2) drawing indicates one in male latrine and also smokes in the office spaces.

Question 4: If smoke detectors are to be used in the two smaller shop areas, will spacing requirements (typically 30 ft. spacing) be de-rated to 25-27 ft. because of lay-in ceiling height? If so, these two spaces may require 1 additional smoke per space. **Answer 4:** Heat detectors are to be used in all shop areas, spacing and quantities shall be IAW NFPA 72 chapter 5 and Table 5.6.5.5.1.

Question 5: For the larger shop space, the ceiling is in the 14 ft. high proximity, so for heat detectors or smoke detectors, will a spacing reduction apply here also and how much? **Answer 5:** Heat detectors are to be used in all shop areas, spacing and quantities shall be IAW NFPA 72 chapter 5 and Table 5.6.5.5.1.

Question 6: For the welding shop, ceiling/roof is about 16 ft.; spacing reductions; how much for heat detectors or for smokes; detectors to be mounted at roof deck elevation? **Answer 6:** Heat detectors are to be used in all shop areas, spacing and quantities shall be IAW NFPA 72 chapter 5 and Table 5.6.5.5.1.

Question 7: Use NFPA 72 detector spacing reductions (NFPA 72, 2002) charts? **Answer 7:** Yes.

Question 8: NFPA 72 requires smoke at fire panel location; not on plan? **Answer 8:** The drawings are for guidance only, System design will be IAW NFPA 72, UFC 3-600-01 and Ft. Campbell requirements.

Question 9: Are Ft. Campbell's normal installer / designer requirements to apply (i.e Tn. or Ky. State Alarm licensing, or will written specs sections 1.3.7.2 and 1.3.7.3 apply ? **Answer 9:** Compliance with Tennessee and /or Kentucky state requirements will be recognized as equal to specification references.

C. See attached revised drawings: 7179 SHT 2 Revised and Sht 1 Revision 2.

D. All other terms and conditions remain unchanged.

Contract Specialist: Tracy R. Mueller, 270-798-7833, tracy.mueller@us.army.mil, Fax: 270-798-3987 Contracting Officer: Angela Jacobs, 270-798-0380
